## ◆ More Than a Book Light

Where is it written that a book light must be used only for books? Climb out of that pigeonhole with the MyLight™ LED Clip Light, a mini-clamp lamp that fits in your palm, pumps out a beam bright enough to make you squint, never burns out and attaches to practically anything with a wide-opening rubberized clip. Use it as a book light, a no-USB-port-needed keyboard light, for map reading in a car, and anywhere from a shelf or a hat to a tent, toolbox or music stand. MyLight™ LED Clip Light is waterproof, shock resistant and available in six colors. It comes with two lithium batteries and has an average battery life of 40 hours.

The MyLight LED Clip Light sells for \$9.95 at [www.mylight.com](http://www.mylight.com).
